Memorandum

To H. P. Wehrenberg, Board of Public Works Date September 1, 1978

From Purchasing Department

Subject Bid Reference Number 854 - Dump Bodies

COPIES TO:

G. Neu

Enclosed you will find Bid Documents - Bid Number 854 - relating to Purchase Order Number 4-03057, which is prepared in favor of Ernst Truck Equipment, for two (2) Dump Bodies, in the amount of \$7,566.40.

The Following documents are attached in support of the recommendation for acceptance of Ernst's offer.

1. Copy of Tabulation Sheet
2. Copy of Mailing List
3. Copies of Two (2) Bids received
4. Copy of Memorandum from Street Department
5. Purchase Order

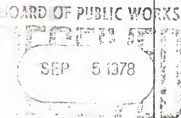

As the Bid Tabulation Sheet indicates Ernst Truck was the lower of the two (2) bids received. Six (6) Vendors were mailed Invitations to Bid. Only Ernst Truck and W. A. Jones & Sons responded. The successful bidder has meet all specifications, as required, and has been reviewed and approved by the Street Department.

Would you please process all of the attached documents for Council Approval.

Crankshaft P.T.O. Hydraulic System

The Central Hydraulic System Under These Specifications Shall Have The Following Minimum Specifications.

The hydraulic pump shall be capable of delivering a minimum of 26 G.P.M. at 2000 P.S.I. at normal truck engine speed. It shall be connected to the engine crankshaft pulley by a double universal splined shaft, or any other method approved by the truck manufacturer. A universal joint flange, a kit necessary for the connecting of the pump to the crankshaft pulley shall be furnished by the truck manufacturer. The truck manufacturer shall also furnish as part of the crankshaft P.T.O. Kit, a heavy duty front bumper extended a minimum of 9" forward of the radiator grill and a hood of such design so as to permit the installation of a front mounted snow plow and also the normal servicing of the truck engine.

A four section hydraulic bank Valve having a minimum capacity of 29 G.P.M. at 2000 P.S.I. shall be installed outside the truck cab in such a manner so as to facilitate its servicing in a convenient manner. Control levers connecting to the bank valve shall be so installed in the cab at the drivers right side within a convenient reach of the driver or companion operator. The control levers shall be clearly marked so as to their function and each lever shall be easily disconnected at the bank so as to make each lever inoperative from the cab when it is so desired. The control levers shall be so adjusted so as to operate the front plow, underbody scraper and dump body. Provisions shall be made at the bank valve for power beyond to facilitate the installation of a spreader valve or any other hydraulic attachment of a similar nature. Each valve to be individually adjustable for pressure relief. A hydraulic 30 gallon oil reservoir tank of an approved type and of sufficient capacity shall be so installed to permit maximum cooling and convenient servicing. A replaceable 50 G.P.M. cartridge type oil filter with a 33 micron element shall be installed on the return line.

The hydraulic suction hose from the reservoir to the pump shall be a minimum 1 1/4" dia. with a 100R4 S.A.E. rating or better. The hydraulic pressure hose from pump to the valve bank shall be a minimum of 3/4" dia. with a 100P2 rating or better. The return hose to the reservoir and through the filter shall be a minimum 1" dia. with 250 P.S.I. rating or better. All lines shall be properly supported at all points and protected from chafing.

Any parts or components which are required for a complete operable hydraulic system shall be included.

All hoses, fittings, and component parts for connecting any hydraulic attachment such as the plow, scraper, dump box, etc., are to be supplied by the manufacturer of the particular attachment.

Deeds Equipment Central Hydraulics

Front Mounted Snow Plow

The Snow Plow Furnished Under These Specifications Shall Have The Following Minimum Specifications.

1. Moldboard length - 10 ft.
2. Moldboard height - 36 In.
3. Moldboard thickness - 10 Ga.
4. Cutting edge - 1/2 In. x 6 In. x 9 ft. Standard A.S.H.O. Punch
5. Number and thickness of ribs - 8 ribs 1/8 In. x 3 In.
6. Bottom reinforcing angle - 5/8 In. x 3 In. x 4 In.
7. Top reinforcing angle - 3/8 In. x 2 1/2 In. x 2 1/2 In.
8. Semi-circle - 3/8 In. x 3 1/2 In. x 3 1/2 In.
9. Number and size of hinge points - 4 of 1 In. dia.
10. Outside demension of hinge spread - 77 In. min.
11. Two H.D. adjustable trip springs in protective steel cylinders
12. H.D. rubber snow shield
13. Screw adjustable ballbearing wheel with 4.80 x 8 In. 6 ply pneumatic tires on a swivel caster
14. Plow hydraulically adjustable to 7 plowing positions with 2 cylinder cab control
15. Weight - plow only - approximately 1500 lbs.

The plow shall be mounted to the front bumper with a 34 In. wide root quick hitch or equal. Reinforcing shall be at the bumper and truck frame. No attachment to the front axle will be permitted. The plow hitch shall be operated by its valve in the truck cab.

Specifications For Hydraulic "V" Box Material Spreader

General - The spreader shall consist of:

A steel "V" box hopper body; horizontal spinner mechanism; separate hydraulic motor drives for spinner and body conveyor; a rigid steel framework to support the body and spinner mechanism; necessary hardware recommended by manufacturer for mounting in a 10' x 7' dump body.

The Spreader Shall Meet Or Surpass The Following Specifications:

1. Body: 10 Ga. hygrade steel with double crimped top edge interlined with formed channel. Body length shall be 10'. Body width shall be 80" or more. Body height shall be 50" or less. Body slope shall be not less than 45°. Hopper shall have 5.6 Cu. Yd. capacity water level full. Body and conveyor are to be electrically welded into a common solid unit. There shall be formed supporting jacks of 10 Ga. steel welded on 2' centers extending from the bottom support channels to the top of the sloping sides. The bottom support channels shall be 3" structural steel channel providing a rigid base for the longitudinals and supporting jacks. A 6" junior I beam shall extend from front to rear at the top center of hopper body and shall be welded in place thus providing a brace and hinge point for top screens. The rear of the hopper shall have an adjustable gate with a screw type jack allowing a positive gate setting.
2. Conveyor: Shall be of 10 Ga. higrade steel formed channel with top edge formed down over conveyor chain providing a chain shield to prevent material from entering chain links. Conveyor bottom shall be a replaceable 3/16" steel plate.
3. Chain: Shall be of formed alloy steel with heat treated hardened steel pins. The chain shall have a 4" adjustment range. Drive assembly shall be minimum 6 tooth, selfcleaning drop forged sprockets keyed to 2" diameter drive shaft. It shall be driven by a spin gear box with minimum 6:1 reduction ratio with machine cut gears in a shielded housing and running in oil. The idler shaft shall be 1 1/2" diameter with minimum 6 tooth self cleaning sprocket opposite the welded sprocket.
4. Spinner: Shall be 18" diameter or larger disc of 10 Ga. steel with 6 formed heat treated, replaceable flights. The disc is mounted on an easily replaceable hub connected directly to the gear type hydraulic drive motor. The drive motor shall be supported by formed heavy duty channel. Above the disc there shall be adjustable baffles to control direction of spread. The spinner hopper shall be fully enclosed and bolted to body sills. Drive shaft shall be telescopic providing severral height adjustments. Housing to be vertically adjustable also. The entire subassembly shall be removable for easy storage and service.
5. Hydraulic System: The system shall be a variable speed spinner control to operate independly of conveyor speed. This control will be mounted outside of the spinner assembly to allow it to be pre-set and untouched by the operator. The oil not used by the spinner will go to the conveyor motor to allow 100% of oil pumped to be used.

Conveyor speed will be a direct function of hydraulic pump output.

Manufacturer must supply an electric on-off switch in the cab. Relief valves must be present to insure component safety from extremely high pressures. Central hydraulics will be furnished by city and spreader shall have necessary hoses, valving, and fittings to hook up to central hydraulic system.

6. Drive: Separate hydraulic "orbital" type motors for high starting and running torque at low speed shall power the spinner and conveyor gear box.
7. Accessories: Screens over hopper slightly elevated at the center allowing large objects to roll off the box. Unit to be equipped with "belt over chain" conveyor to protect conveyor and chain. An automatic chain oiler, if available, is also asked for. 4 section baffle system to control width and direction of speed. Inverted "V" adjustable to reduce load pressure on conveyor.

Crankshaft P.T.O. Hydraulic System

The Central Hydraulic System Under These Specifications Shall Have The Following Minimum Specifications.

The hydraulic pump shall be capable of delivering a minimum of 26 G.P.M. at 2000 P.S.I. at normal truck engine speed. It shall be connected to the engine crankshaft pulley by a double universal splined shaft, or any other method approved by the truck manufacturer. A universal joint flange, a kit necessary for the connecting of the pump to the crankshaft pulley shall be furnished by the truck manufacturer. The truck manufacturer shall also furnish as part of the crankshaft P.T.O. Kit, a heavy duty front bumper extended a minimum of 9" forward of the radiator grill and a hood of such design so as to permit the installation of a front mounted snow plow and also the normal servicing of the truck engine.

A four section hydraulic bank Valve having a minimum capacity of 29 G.P.M. at 2000 P.S.I. shall be installed outside the truck cab in such a manner so as to facilitate its servicing in a convenient manner. Control levers connecting to the bank valve shall be so installed in the cab at the drivers right side within a convenient reach of the driver or companion operator. The control levers shall be clearly marked so as to their function and each lever shall be easily disconnected at the bank so as to make each lever inoperative from the cab when it is so desired. The control levers shall be so adjusted so as to operate the front plow, underbody scraper and dump body. Provisions shall be made at the bank valve for power beyond to facilitate the installation of a spreader valve or any other hydraulic attachment of a similar nature. Each valve to be individually adjustable for pressure relief. A hydraulic 30 gallon oil reservoir tank of an approved type and of sufficient capacity shall be so installed to permit maximum cooling and convenient servicing. A replaceable 50 G.P.M. cartridge type oil filter with a 33 micron element shall be installed on the return line.

The hydraulic suction hose from the reservoir to the pump shall be a minimum 1 1/4" dia. with a 100R4 S.A.E. rating or better. The hydraulic pressure hose from pump to the valve bank shall be a minimum of 3/4" dia. with a 100P2 rating or better. The return hose to the reservoir and through the filter shall be a minimum 1" dia. with 250 P.S.I. rating or better. All lines shall be properly supported at all points and protected from chafing.

Any parts or components which are required for a complete operable hydraulic system shall be included.

All hoses, fittings, and component parts for connecting any hydraulic attachment such as the plow, scraper, dump box, etc., are to be supplied by the manufacturer of the particular attachment.

Deeds Equipment Central Hydraulics
as specified above-----\$1,395.00

Front Mounted Snow Plow

The Snow Plow Furnished Under These Specifications Shall Have The Following Minimum Specifications.

1. Moldboard length - 10 ft.
2. Moldboard height - 36 In.
3. Moldboard thickness - 10 Ga.
4. Cutting edge - 1/2 In. x 6 In. x 9 ft. Standard A.S.H.O. Punch
5. Number and thickness of ribs - 8 ribs 1/8 In. x 3 In.
6. Bottom reinforcing angle - 5/8 In. x 3 In. x 4 In.
7. Top reinforcing angle - 3/8 In. x 2 1/2 In. x 2 1/2 In.
8. Semi-circle - 3/8 In. x 3 1/2 In. x 3 1/2 In.
9. Number and size of hinge points - 4 of 1 In. dia.
10. Outside demension of hinge spread - 77 In. min.
11. Two H.D. adjustable trip springs in protective steel cylinders
12. H.D. rubber snow shield
13. Screw adjustable ballbearing wheel with 4.80 x 8 In. 6 ply pneumatic tires on a swivel caster
14. Plow hydraulically adjustable to 7 plowing positions with 2 cylinder cab control
15. Weight - plow only - approximately 1500 lbs.

The plow shall be mounted to the front bumper with a 34 In. wide root quick hitch or equal. Reinforcing shall be at the bumper and truck frame. No attachment to the front axle will be permitted. The plow hitch shall be operated by its valve in the truck cab.

Memorandum

To Henry P. Wehrenberg, Board of Works

Date September 1, 1978

From Gerald P. Neu, Street Commissioner

Subject Truck Bid

COPIES TO:

On August 24, 1978, at the City of Fort Wayne Purchasing Department bids were opened for 4 or 5 new single axle heavy duty dump trucks complete with front snow plow, under body blade and salt spreader. Bidding was Allen County Motors, 2300 West Jefferson Street, Fort Wayne, International Harvester, Fort Wayne, and the Hite Equipment & Repair, 1321 West Jefferson, Plymouth, Indiana.

If I may, I would like to take this opportunity to recommend for use by the Street Department 4 Units from Allen County Motors which had the low bid of \$160,281.32. I would also like to recommend the purchase of one Case 4 wheel drive tractor with front "V" plow from Hite Equipment & Repair at a cost of \$31,995.00.

Gerald P. Neu, Street Commissioner
